₹1,30,000

DEVELOPMENT (ONE-TIME)

₹5,000

OPTIONAL SETUP

~₹10,300

TOOLS / YEAR

About This Document

This document works as both a **proposal** and an **invoice**. It explains what will be built, what each part costs, and which costs are for development work versus tools and services purchased from outside providers (like the domain, hosting, payment gateway, and WhatsApp).

All prices are in **Bangladeshi Taka (₹)** and reflect average market rates for a custom-built e-commerce solution of this size. Charges are kept transparent so you always know what you are paying for and to whom.

Two kinds of charges are kept separate throughout:

1) Developer charges — one-time payments for building and setting up the website.

2) Tools & services — recurring or third-party costs paid to outside providers (domain, hosting, payment gateway, WhatsApp).

These are **not** developer income.

What You Get — Scope of Work

The project is a fully custom online store — not a template. It has two sides: the **customer website** and a private **admin panel** to run the whole business.

Customer Website

- Modern, mobile-friendly storefront
- Product browsing, search & categories
- Product detail pages with photos
- Shopping cart & slide-out cart drawer
- Wishlist / favourites (per customer account)
- Customer accounts, login & order history
- Secure checkout & order tracking
- Discount pop-ups, hero sliders & sale pages

Admin Panel

- Dashboard with sales charts & insights
- Product management with real photo uploads
- Order management & status updates
- Customer list & details
- Promotions & discount campaigns
- Coupon code generator
- Store settings & secure admin login

New Features Being Added

Online Payment Gateway — SSLCommerz

Customers pay online using **cards, bKash, Nagad, Rocket and internet banking** — all through a single, trusted Bangladeshi gateway. Money settles directly to the business bank account. No monthly fee; the gateway charges a small percentage per successful sale only.

WhatsApp Business Automation (Admin Alerts)

The website automatically sends the admin WhatsApp messages so the shop can be managed from the phone, without logging in. Alerts included:

- **Low-stock alert** — when a product is about to run out
- **Back-in-stock update** — when a product is restocked
- **New order alert** — instantly when a customer places an order
- **Weekly sales summary** — total orders & revenue every week
- **Monthly sales report** — a bigger picture each month
- **Suggested extras** — payment received alert, order cancelled alert, daily "good morning" sales snapshot, and best-selling product of the week

Note: The website is already built and working (storefront + admin panel + promotions + coupons). This proposal covers the full build plus the two new features above, priced item by item so you can see the value of each part.

A. Developer Charges — One-Time Development

Paid to the developer for designing, building, testing and delivering the website.

ITEM	QTY	RATE (₹)	AMOUNT (₹)
Customer Website (Storefront) Multi-page responsive store, cart, wishlist, checkout, accounts, order tracking	1	30,000	30,000
Backend, Database & Secure Login Server API, product/order/customer database, encrypted authentication	1	25,000	25,000
Admin Management Panel Dashboard & charts, products with image upload, orders, customers, settings	1	28,000	28,000
Promotions, Discounts & Coupon System Auto-apply discounts, home pop-up, hero slider, sale pages, coupon generator	1	12,000	12,000
Payment Gateway Integration (SSLCommerz) Secure online payments — cards, bKash, Nagad, Rocket, net banking	1	12,000	12,000
WhatsApp Business Automation Low-stock, restock, new-order, weekly & monthly report alerts to admin	1	15,000	15,000
Testing, Deployment & Handover Final testing, going live, and a walkthrough/training session	1	8,000	8,000
Developer Subtotal (A)			1,30,000

B. Optional Developer Add-Ons

ITEM	AMOUNT (₹)
Hosting & Domain Setup (if handled by developer) Server setup, domain connection, SSL, and going live — one-time minimum charge. If you prefer to set these up yourself, see recommendations on the next page (this charge is removed).	5,000
Monthly Maintenance & Support OPTIONAL Updates, backups, small changes, and priority support — billed per month, only if you want it.	3,000 / mo

C. Tools & Services — Paid to Outside Providers

These are **not** developer charges. They are yearly/usage costs paid to third-party providers to keep the site online and processing payments.

SERVICE	WHAT IT'S FOR	APPROX. COST
Domain name (.com)	Your web address, e.g. bowandtie.com	£1,300 / yr
Web hosting (VPS)	Keeps the website online 24/7	£9,000 / yr
SSL certificate	The padlock / https security	Free
SSLCommerz gateway	No setup/monthly fee — ~2.5–3% per sale only	Per sale
WhatsApp alerts	Admin notifications (see next page)	Free tier*
Estimated Tools Subtotal (C)		~£10,300 / yr

*WhatsApp: admin alerts fit inside the free monthly allowance in most cases — details on the next page.

Developer Total (A) — payable to developer	£1,30,000
Optional hosting setup (B) — if developer handles it	£5,000
TOTAL DUE TO DEVELOPER (one-time)	£1,35,000

Tools & services (Section C) are paid directly to the providers and are billed separately from developer charges.

WhatsApp Automation — Is It Free?

Short answer: **the admin alerts are effectively free to run**, but the right setup matters. There are two ways to do it — both are explained honestly below.

Option 1 — Official WhatsApp Cloud API ✓ Recommended

- **Cost:** Meta gives a **free monthly allowance** (around 1,000 conversations/month). Since alerts only go to **you** (the admin), you almost always stay within the free tier. Beyond that, "utility" messages cost roughly **₹0.40–0.60 each** — a few taka a month at most.
- **Reliability:** Official and stable. Your number will **not** get banned.
- **What's needed:** A free Meta Business account, a phone number for WhatsApp Business, and a one-time verification. The developer sets this all up.
- **Best for:** A real business that wants alerts to always arrive. This is what the price includes.

Option 2 — Free Unofficial Method ⚠️ Cheaper but risky

- **Cost:** ₹0 — uses a free open-source tool that logs in like WhatsApp Web.
- **Risk:** It is **against WhatsApp's rules**. The number can be **blocked or banned** without warning, and it can stop working after WhatsApp updates.
- **Upkeep:** Needs the phone/session to stay connected; less stable.
- **Best for:** Testing or a very tight budget where an occasional outage is acceptable.

Recommendation: Go with the **Official Cloud API**. For admin-only alerts the running cost is essentially free, and it protects your business number. The unofficial option is available on request if you prefer zero third-party setup.

Hosting & Domain — Two Ways to Handle It

Developer sets it up

A one-time **₹5,000** setup charge (Section B). Includes buying/connecting the domain, configuring the server, SSL, and launching the site. You still pay the yearly provider costs in Section C.

You set it up yourself

The ₹5,000 setup charge is removed. Recommended, reliable options:

- **Domain:** Namecheap or Exonhost (~₹1,300/yr)
- **Hosting:** Contabo or DigitalOcean VPS, or local **Exonhost / HostMight** (~₹9,000/yr)
- **SSL:** Free (Let's Encrypt)

Payment Schedule & Terms

MILESTONE	STAGE	AMOUNT (₹)
40% Advance	To begin work	54,000
Total (incl. hosting setup)		1,35,000

MILESTONE	STAGE	AMOUNT (₹)
40% Midway	On beta/demo approval	54,000
20% Final	On delivery & go-live	27,000
Total (incl. hosting setup)		1,35,000

- Prices are in BDT and valid for 30 days from the date on this document.
- Tools & services (Section C) are paid to their providers and billed separately.
- Estimated timeline for the two new features (payments + WhatsApp): **2–3 weeks** after advance.
- One round of minor revisions is included with each milestone.
